

Shift to eTendering
and eAuction Solutions

Maximise Savings
and Transparency

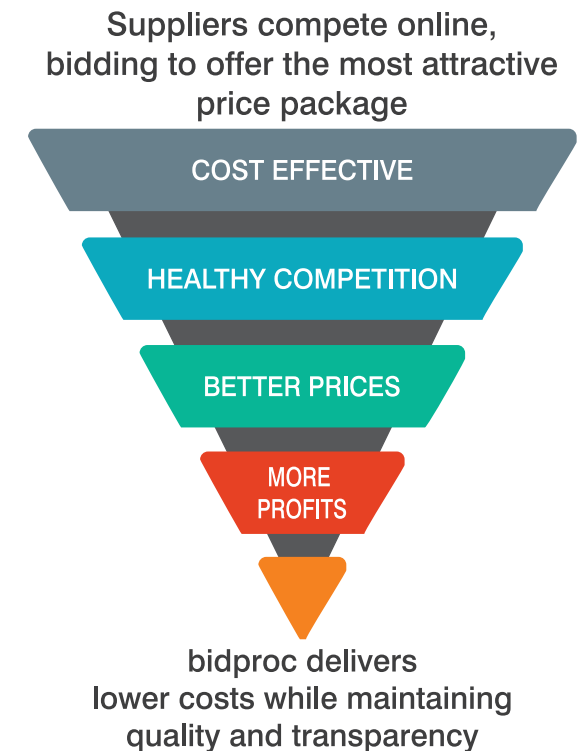

*Maximise Savings
and Transparency*

bidproc empowers organisations to make the shift.

bidproc presents to you a powerful, integrated platform that is built to empower corporate organisations to make the shift, to the next level of Procurement & Disposal operations. Delivering secure, transparent and effective delivery models, bidproc is easily adaptable to implement individual eTender or eAuction events or deliver an integrated procurement process, by combining the power of eTender and eAuction, into one wholistic, seamless event.

Result?

Maximised savings and a higher compliance to best practices.

■ High impact eProcurement Solutions

Move your Procurement action to high-impact results using bidproc's integrated eTendering and eAuction services. eTendering process is highly prevalent in many corporate organisations who aim to procure Goods & Services following a secure and transparent model while being compliant to the company's policies.

■ bidproc eTendering

The eTendering module of bidproc supports distinct and transparent streamlining of the entire process. And you don't have to stop at that; Optionally, you can further seamlessly connect to bidproc's Reverse eAuction module to extract the best prices possible from the selected suppliers used in the eTendering Event.

■ bidproc eTendering features for Procurement:

- Supplier Sourcing through RFX
- Tender Publish & Response
- Traceability and Compliance
- Approved Vendor List (AVL)
- Tender Envelopes & Committees
- Independent Audit Trails

*Maximise Savings
and Transparency*

bidproc Reverse eAuctions are used by organisations to purchase Service Contracts, Assets and Commodities by competitive reduction in the prices by the Suppliers, thereby leading to significant Savings in their Procurement Spend.

■ Reverse eAuctions for maximum price gain

Reverse eAuctions are powerful models used in the Procurement processes to extract the maximum pricing gain from your existing suppliers during purchase of products/services that are influenced by price, volume and standard specifications.

■ bidproc Reverse eAuction features for Procurement:

- Comprehensive Dashboard
- Customized eAuction Events
- Supplier Registration
- Propagation of Invitation & Advisories
- Supplier Profiles & History
- Powerful eBidding Hall
- Supplier Privacy by Encryption
- Detailed Reports
- Independent Audit Trails
- Archives & Templates.

Maximise Savings and Transparency

bidproc Forward eAuctions are used by organisations to dispose all kinds of Products, Used Equipment, Scrap, Excess Project Goods and Commodities by competitive Increase in the prices listed by the Bidders, thereby resulting in significant Gains in their Disposals.

Maximise Savings and Transparency

■ bidproc for Disposals

Disposals are processes involved in the selling of Products / Commodities / Assets belonging to organisations. Though Disposals are not usually a core activity of a Procurement Department, it usually falls in their responsibility to extract the maximum Gains from such transactions.

Disposals require full compliance to procedures followed as per company policy, while ensuring transparency and equal opportunities to the Bidders.

■ bidproc Forward eAuction features for Disposals:

- Comprehensive Dashboard
- Customized eAuction Events
- Provision for Bidder Registration
- Propagation of Invitation & Advisories
- Bidder Profile & Engagement History
- Powerful eBidding Hall
- Privacy of Bidders by Encryption
- Detailed Reports
- Audit Trails for each eAuction Event
- Archives & Templates

bidproc Engagement Models

*Maximise Savings
and Transparency*

1 Managed Model

The Managed Model is an ideal choice when you have regular Procurement or Disposal Events and would like your own team to manage them.

Here, you get access to the full functionality of the powerful bidproc platform, through a flexible 'bidproc Subscription' mechanism. Just buy the Event Packs as you need and run Integrated events of eTenders & eAuctions in full confidence, customized to your internal process functions.

Generate all kinds of Reports to ensure compliance from the bidproc platform with detailed Event Analytics.

2 Outsourced Model

The fully Outsourced Model simplifies your Disposal Events, by completely 'Outsourcing' the entire Event over to us.

This option is best suited if when conducting 'one-off' or large eAuction Events, and when there is a lack of resources to conduct the full Event.

Just point us to your requirements, give us your expectations and let us do the rest in full transparency & compliance of your needs.

Let businessgateways manage your entire event:

- Event Creation & Propagation
- Supplier / Bidder Registration
- Invitation
- Pre-Qualification
- Selection & Security Deposit Management
- Bidder & Event Authority Training
- Event Hosting
- Identification of Winning Bidder
- Award | Reports & Audit Trail

3 Software Lease Model

bidproc can be installed in your premises, branded and white labeled to your organisation with all the features that bidproc offers. The Software Lease option further allows you to integrate bidproc to your existing Procurement System, and begin reaping benefits in every Procurement or Disposal Event you conduct
